Control Panels and Systems

H2K Technologies, Inc.

Features and Capabilities

- Remote monitoring and control from alarm dialers to SCADA systems

- UL-compliant construction including UL508A & UL698A (Class 1 Div. 1&2)

- Auto-CAD schematic wiring diagrams, component layout, and electrical power diagrams

- Follow-up site and phone support to ensure proper system operation

- Turn-key systems for water and air remediation or industrial treatment

H2K Technologies' Control Panels and Systems team offers:

- **Competitive pricing** and **responsiveness** every step of the way: quotes, submittals and delivery
- **Flexibility** in control methodologies and programmable logic controllers, including Allen Bradley, Automation Direct, Modicon and most other major manufacturers - with or without operator interfaces
- **Reliability** by using Industry-recognized components and following applicable UL and NEC procedures

We offer complete control system design-build capabilities, or can quote a project to your specifications. Already have a panel design? We will gladly review it for safety and operational improvements and possible areas for cost savings.

We have furnished hundreds of control panels and systems for a broad range of water, wastewater, industrial process and OEM applications.
