

Chemical Injection Systems

Applications

- Water pH level adjustment
- Caustic fluid injection
- Chemical metering pumps
- Oxygen removal
- Carbon dioxide removal
- Reduce equipment fouling from solids
- Industrial process water adjustment and treatment

Features, Specifications, and Options

- Skid-mounted, self-contained chemical injection packages
- Integrated control panel for local control of system
- Remote telemetry package available with control panel for system control and monitoring with any internet connection
- Pre-treatment filters available to protect equipment
- Metering pumps with adjustable flow output for advanced control of chemical injection
- Membrane filters to control levels of oxygen and carbon dioxide
- Features Walchem, LMI, and Milton-Roy metering pumps
- Caustic tank and liquid supply available
